Lahore, Pakistan | +92-310-7708080 | talhakhalid142@gmail.com
LinkedIn | GitHub | Kaggle

Summary

Aspiring data analyst with hands-on experience in Power BI, SQL, MySQL, AI/ML, and automation tools. Recently completed a degree in Data Analytics and gained practical experience through internships at PEL and Allzone Technology. Passionate about applying NLP, RAG systems, and automation to solve complex business challenges.

Education

BS Data Analytics, Government College University, Faisalabad **2021 – 2025**
Final Year Project: Developed a web application for Air Quality Index Prediction using machine learning techniques.

Experience

AI/ML Intern *Allzone Technology, Lahore*
September 2025 – October 2025

- Worked on Artificial Intelligence and Machine Learning projects involving data preprocessing, model training, and performance evaluation.
- Implemented supervised learning models using Scikit-learn and TensorFlow.
- Designed workflow automations using **n8n** for AI-driven data processing.
- Contributed to AI automation tasks and optimized ML pipelines for prediction accuracy.

Data Analytics Intern *PEL, Lahore*
July 2024 – August 2024

- Performed data analysis using SQL and created interactive Power BI dashboards for sales and collection insights.
- Built and managed a MySQL database to store and structure sales data efficiently.
- Designed DAX-based measures to analyze trends, payment vs. actual collection, and overdue patterns.
- Conducted data cleaning to ensure accuracy and reliability for reporting.

Projects

Air Quality Index Prediction Web App *Python, Scikit-learn, Streamlit (2025)*

- Built a web application that predicts AQI using machine learning algorithms.
- Cleaned and visualized air quality datasets and integrated the model into a user-friendly interface.

Mental Health Text Classification with LSTM *Python, Keras (2025)*

- Developed a deep learning model to classify text into: Depression, Anxiety, Stress, or Normal.
- Applied text preprocessing: lowercasing, punctuation removal, tokenization.
- Built a model using embedding layer, Bi-LSTM, dropout, and softmax output.

Medical RAG Question Answering System *LangChain, HuggingFace, FAISS (2025)*

- Built a Retrieval-Augmented Generation (RAG) system to answer medical questions using custom PDF files.
- Used HuggingFace embeddings, LangChain chains, and FAISS vector store for document retrieval and response generation.

Skills

Programming & Data Science: Python, SQL, MySQL, Excel **Machine Learning:** Scikit-learn, TensorFlow, Keras, LSTM, Pandas, Matplotlib

Data Visualization: Power BI, Streamlit, DAX **Automation & Tools:** n8n, Web Scraping (Scrapy)

NLP & RAG: NLP, RAG Systems, LangChain

Certifications

- Learning Data Analytics: Foundations — LinkedIn Learning, 2024

Languages

English (Fluent) | Urdu (Native)
